<p>Entry Description</p> <p>The reduced wall thickness in this structural web project has allowed for a stronger yet lighter part. The unique rib design requires less backfill material thereby saving material and labor. The snap on Equal Flow End Plates eliminate the need for screws and power tools.</p>	
<p>Why is this Part Innovative?</p> <p>No stone required. Eliminates stone masking stone clean up and minimizes landscape damage. Louvers are set at 30 degrees to help prevent soil intrusion.</p>
