Entry Description

Family of easy access systems for above ground swimming pools.

Why is this Part Innovative?

This group of knock-down parts is innovative because it offers the end user an opportunity to mix and match to best suit their above ground pool's needs.

The large 36" step doubles as a place to sit for parents and grandparents when in the pool as well as offering a sense of security for entering and exiting the pool. Ease of assembly is accomplished with the unique snap fit design.

The A-Frame ladder offers an economic method to access the pool and is fully adjustable for three different pool heights. It can easily be adapted to fit with the 36" large step to create a lift away security system or be adapted to fit a deck. All of these combinations improve the enjoyment of the backyard. Pool.
